

List of shepherds and groups
interested in collaborating with
the LIFE CAÑADAS project

Deliverable (Action B1)

03

List of shepherds and groups interested in collaborating with the LIFE CAÑADAS project in Madrid Drove Road Network

04

List of shepherds and groups interested in collaborating with the LIFE CAÑADAS project in Conquense Drove Road

The general goal of LIFE CAÑADAS is to enhance the role of the Spanish network of drove roads as Green Infrastructure that provides connectivity between Natura 2000 sites, by means of improving their conservation status and their associated ecosystem services, restoring their multi-functionality and assuring their adequate and sustainable management. As a part of the LIFE CAÑADAS project, we organized the initial meeting with the whole partnership at the UAM headquarters on 28 November 2019. Finally, the LIFE CAÑADAS partnership took the first group photo of the Project at the end of the meeting.

The main objective of this deliverable is to synthesize in a list the key contacts that allow us to establish or strengthen collaboration links with local and transhumant shepherds and groups interested in collaborating with the LIFE CAÑADAS project.

List of shepherds and groups interested in collaborating with the LIFE CAÑADAS project in Madrid Drove Road Network
